EDUCATION

B.S. in Computer and Information Systems Security

Expected May 2026

Florida International University – Miami, Florida

- GPA: 3.82/4.0 | Undergraduate Certificate in Cybersecurity Intelligence & Information Policy

CERTIFICATIONS

- | | |
|--|--------------------|
| • AWS Security Specialty | In progress |
| • AWS Solutions Architect Associate | Jan 2026 |
| • CompTIA Security+ | Dec 2024 |

SKILLS

- **Cloud & Infrastructure** – AWS (EC2, S3, VPC, SQS, SNS, Lambda), Infrastructure as Code (CloudFormation, Terraform), Linux (Kali, Ubuntu), Windows
- **Programming & Automation** – Python, Java, C, Ruby, Bash, Git, Scripting
- **Security & Systems** – Least privilege, Zero Trust, encryption (TLS, KMS), logging & monitoring, incident response, DLP, IDS/IPS

EXPERIENCE

Florida International University – Miami, Florida

Sep 2024 – Present

Hardware Lab Assistant & Course Learning Assistant

- Took ownership of Linux-based lab environments by maintaining and troubleshooting Kali Linux and Ubuntu systems, resolving update, patching, and network connectivity issues to prevent lab delays and keep coursework moving
- Supported 150+ students per term to complete labs successfully by helping debug C and Java programs, use Linux CLI tools, and understand OS and networking concepts

Handshake AI – Remote, US

Oct 2025 – Present

AI Trainer – Generalist (Fellowship)

- Improved the quality of AI evaluation data by reviewing AI-generated technical answers, refining prompts, and flagging reasoning errors across programming and systems-related questions

PROJECTS

Event-Driven Messaging (Amazon SQS – Standard & FIFO)

Nov 2025

- Implemented and tested Standard and FIFO SQS queues to compare ordering, deduplication, and delivery guarantees, building practical understanding of tradeoffs in event-driven systems

Incident Response Automation with AWS Config and Lambda

Jul 2025

- Built an automated remediation workflow that detects unauthorized Security Group changes using AWS Config and immediately restores approved rules with Lambda, reducing the time insecure network configurations remain exposed

Monitoring & Alerting with AWS CloudTrail

Jun 2025

- Created an event-driven monitoring pipeline that analyzes CloudTrail logs to detect failed authentication and sensitive configuration changes, enabling faster awareness of security activity without external SIEM tools
